ABSTRACT

10 DNA sequences coding for the DR- β -chain
locus of human lymphocyte antigen complex and diag-
nostic typing processes and products related thereto.
DNA sequences that code for the β -chain DR locus
are useful in simple and efficient typing processes
and products and for expression of polypeptides dis-
playing an immunological or biological activity of
the antigens of the HLA-DR β -chains for use in diag-
15 nostic, preventive and therapeutic agents.
